

2008 District VIII ODP Team Selections

1996 Girls and 1995 Girls

For the 1996 Girls and the 1995 Girls, the coaching staff has made the decision to develop a pool of players for each of these age groups due to the quality of players. By developing a pool of players, the coaching staff believes that every player will benefit from the level of training provided at each training session. A player pool also provides a competitive, yet challenging environment for the players, which enhances overall player development. The coaches will make a final decision on who will play at the Play Days after the August 27th training session. It is up to the discretion of the coaches to choose between 16-20 players for the final roster. Therefore, it is vital that players attend most, if not **all**, training sessions to improve their chances of making the final roster. If you do not get selected for the final roster, you are still eligible to attend the September and October training sessions. You should also feel proud and be honored that you have been selected to the ODP District VIII Player Pool.

1996 Boys and 1994 Girls

For the 1996 Boys and the 1994 Girls, there are not enough players at this time to field a full team. However, if we are able to get more players out to the training sessions then we will be able to field a district team for these age groups. If you know of any additional players, please have them come out to the training sessions for a tryout as soon as possible. If we are not able to get additional players, there is the possibility of combining with another district to make a United Team for the Play Days. If this is possible then these age groups will be able to attend the Play

Days as a United Team. However, if this cannot be achieved then these players will be individually selected by the coaching staff to attend the Play Days. Therefore, it is vital that players attend most, if not **all**, training sessions to improve their chances of getting selected if necessary.
